

HIGH CONSUMPTION CHECKLIST

You may want to check or have your plumbing expert check the following items before your contact North Ogden City to ensure they are functioning properly. One or more of these items, if not properly functioning may cause increased water usage.

- ✓ Toilet tank float valves
- ✓ Toilet tank stopper plug
- ✓ Operation of the backwash cycle on your water softener (if applicable)
- ✓ In summer months, check the float valves in the swamp cooler (if applicable)
- ✓ Keep in mind, also, extra person(s) in the household whether permanently or just visiting can increase water usage.
- ✓ In summer months, filling a pool (small or large) will increase water usage.
- ✓ Watering from your outside spigots will increase your water usage.
- ✓ Make sure an outside spigot is not dripping.

If, after following this checklist, you are still unable to identify the reason for your increased usage, arrangements can be made with North Ogden Water Department personnel to check for a leak in your service line. For an appointment please call 801-782-8111.

North Ogden Water Department assists homeowners by giving notice of potential problems; however, the City's accountability for water stops at the water meter. Homeowners are therefore responsible for the cost of the water usage, costs related to identifying problems and/or repair costs.
